PROFESSIONAL PROFILE

Senior Lecturer and Research Associate with 6+ years of full-time university teaching experience in Computer Science and Informatics, holding a master's degree in computer engineering from University of Indonesia. Proven record designing and delivering 10+ undergraduate courses (Data Mining, Artificial Neural Networks, Design & Analysis of Algorithms, Applied NLP, AI), developing curricula, and mentoring students through capstone research. Certified Cisco Networking Academy Instructor (5+ years of service) and British Council-certified in English as Medium of Instruction, with additional certifications in Generative AI and AI in Education (Google, Google for Education). Combines classroom teaching with applied educational-technology work, including delivering corporate AI-literacy training, and cross-border academic collaboration (Indonesia–Malaysia joint research, 2021–2024).

EDUCATION

Master of Engineering — Electrical Engineering (Computer Engineering) | *University of Indonesia, Indonesia*

Graduated 2020 · Cum Laude · Full-time

- Thesis: Implementation of machine learning for financial trustworthiness evaluation based on smartphone usage in Indonesia. Supervisors: Prof. Riri Fitri Sari (UI); Prof. Daniela M. Romano (UCL & De Montfort University, UK).

Bachelor of Engineering — Electrical Engineering (Information Technology) | *Diponegoro University, Indonesia*

Graduated 2015 · Upper-Second Class · Full-time

- Thesis: Sentinel Web — implementation of the Laravel framework in a web-based temperature and humidity monitoring system.

ENGLISH LANGUAGE PROFICIENCY

- IELTS — Overall Band Score 6.5 (October 2025).
- All peer-reviewed international publications in English.

LICENSES & CERTIFICATIONS

- English as Medium of Interactions — British Council (Aug 2024) — Skills: Presentation Skills, Teaching.
- Instructor, 5 Years of Service — Cisco Networking Academy (Mar 2025); Instructor, 1 Year of Service — Cisco (Feb 2022).
- IELTS Preparation — UC Irvine (Oct 2025).
- Introduction to Gemini for Education — Google for Education (Jul 2026) — Skills: Google Gemini, Learning Design.
- Google AI Essentials — Google (Mar 2025) — Skills: Artificial Intelligence, Large Language Models.
- Introduction to Generative AI — Google Cloud Training Online (Mar 2025).
- Exploratory Data Analysis with Seaborn — Coursera (Jan 2024); Build a Python GUI with Tkinter — Coursera (Apr 2024).

UNIVERSITY TEACHING EXPERIENCE

Senior Lecturer and Research Associate | *Department of Informatics, Universitas Pembangunan Jaya, Indonesia*

July 2020 – Present

- Deliver and manage 10+ core undergraduate courses, including Data Mining, Artificial Neural Networks, and Design & Analysis of Algorithms, consistently receiving high student evaluation scores.
- Develop comprehensive curricula for Applied Natural Language Processing and Artificial Intelligence, bridging theory with industry-standard practice.
- Mentor and supervise undergraduate students in final-year projects focused on Human-Computer Interaction (HCI) and data-driven system development.
- Facilitate hands-on laboratory sessions for Web-based Computation and Visual Programming, building students' practical coding and problem-solving skills.
- Use educational technology (LMS-based assessment, AI-assisted tools, RAG-based Q&A systems — see Educational Technology section) to support course delivery and assessment.
- Certified Cisco Networking Academy Instructor (5+ years of service, since 2020) — deliver Cisco curriculum alongside core Informatics coursework.

Facilitator, Indonesia Android Kejar / *Google Developer Group, Indonesia*

Nov – Dec 2016

- Taught Android Development for Beginners (curriculum supported by Udacity) to a mixed-ability cohort.
- Of the students taught, 3 placed in the Top 50 and 3 in the Top 100 of Best Participants nationally.

Teaching Assistant / *Department of Electrical Engineering, Diponegoro University, Indonesia*

Aug 2013 – Jan 2015

- Developed lab manuals and instructional materials for Java and PHP programming aligned with the core syllabus.
- Facilitated hands-on practical sessions for first-year and repeating students, focusing on classroom management for mixed-ability groups and fundamental programming logic.
- Enhanced learning outcomes through real-time debugging support and technical troubleshooting during lab hours.

EDUCATIONAL TECHNOLOGY, TRAINING & CURRICULUM DEVELOPMENT

Professional Trainer / *Bank Indonesia (project-based)*

December 2025

- Developed and structured training materials on Cyber Security and Artificial Intelligence to strengthen workforce digital resilience.
- Delivered sessions on AI fundamentals and hands-on ChatGPT/prompt-engineering application for task automation.

Professional Trainer / *PT Perkasa Abdi Bhuana (project-based)*

December 2025

- Designed digital-delivery training modules at the intersection of Cyber Security and AI, including interactive quizzes and structured Q&A to reinforce technical concepts.

Information Technology Consultant / *Coordinating Ministry for Human Development and Cultural Affairs, Indonesia (seasonal)*

2023 & 2025

- Conducted training sessions on professional use of ChatGPT and led implementation of AI agents to automate departmental workflows.
- Advised on integrating emerging technologies into digital infrastructure to improve data accessibility and operational efficiency.

OTHER PROFESSIONAL EXPERIENCE

Information Technology Consultant / *Ministry of Communication and Informatics of the Republic of Indonesia (seasonal)*

Feb 2020 – Sep 2020

- Provided technical consultancy for national ticketing system modernization; facilitated digital-skills training sessions for youth participants.

- Managed server infrastructure and provided technical support for the Directorate General of Immigration.

KEY ACHIEVEMENTS — RESEARCH & INTERNATIONAL COLLABORATION

- Research Leader on a multi-year Indonesia–Malaysia collaboration (Universitas Pembangunan Jaya and Universiti Teknologi MARA, 2021–2024) applying LSTM/ML to large-scale Indonesian public-health discourse; resulted in three publications in IEEE Xplore and indexed journals — evidence of experience leading cross-border, cross-institutional academic teams.
- Led technical development for a national-grant digitalization project for Early Childhood Education (PAUD), including mentoring teachers in digital literacy — direct experience translating technical work into teaching/training outcomes.
- Research Member, University of Indonesia Research Grant (2019): feature selection for credit scoring and performance evaluation of data-center networking, resulting in two IEEE Xplore publications.

SELECTED PUBLICATIONS (26+ TOTAL, FULL LIST ON REQUEST / GOOGLE SCHOLAR)

CORE SKILLS

- Teaching & Curriculum: undergraduate CS/Informatics course design and delivery, mixed-ability classroom management, student mentoring and capstone supervision.
- Educational Technology: LMS-based assessment tools, AI/LLM-assisted instruction (RAG systems, prompt engineering), data-driven course/administrative tools.
- Technical: Machine Learning, NLP/LSTM, Data Mining, Algorithms, Java, PHP, Laravel, Android development.
- Other: cross-institutional research leadership (Indonesia–Malaysia), academic writing and peer-reviewed publishing, government/enterprise technical training delivery.
